

# Our Made To Order Quote Service For Industrial Covers

## Fax to: +61 3 9571 7344

Mulders canvas equipment covers can protect expensive equipment and machines exposed to outdoor, factory or harsh environments. Our covers protect from UV, knocks, dust, wind, liquids, damage etc. We can include windows, flaps, apertures, d-rings, zips or velcro for ease of access and fixing. Padded for extra protection, we offer a rapid design and quote service plus competitive prices. Our are designed to suit the exact dimensions of your equipment but are easy to fit and remove. To quote for your cover we need the lengths below. We will work out a suitable cover design and price plus make necessary spacing allowances for ease of removal. Our covers are normally black in colour, other colours may incur a surcharge.

Can you draw your equipment here with all dimensions:
