

Our Made To Order Quote Service - Sandpit Covers

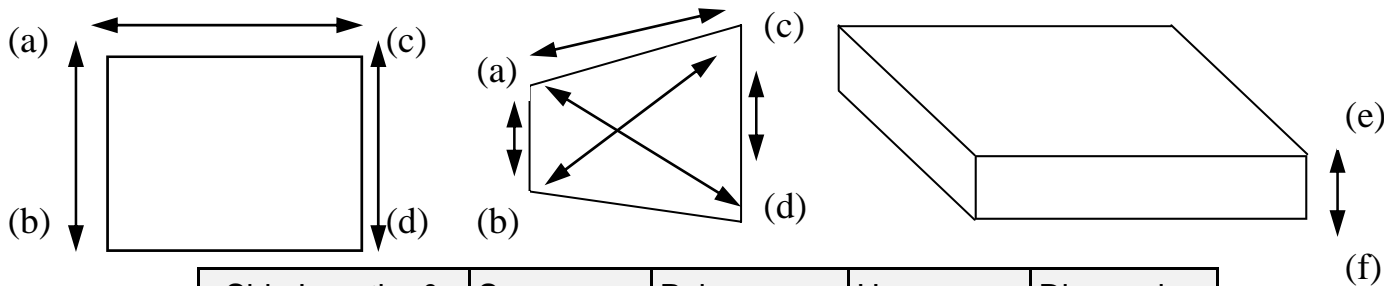

Fax to: +61 3 9571 7344

All of our sandpit covers are designed to keep animals out but allow air to permeate avoiding fungal build-up.

We manufacture our covers on site at our Melbourne factory and use premium quality shade mesh and shock cord - both of which are all weather and tear resistant. The cover is usually held securely in place with a series of brass eyelets and cord loops which can easily be released for quick removal. The whole cover can be rolled up into a small bundle for easy storage. A standard 3m * 3m cover weighs no more than 2-3 kg.

Most sandpit covers are square or rectangular but we can also make other shapes if needed.

1. To quote for your cover we need side lengths and diagonals of the frame as well if your sandpit is not a regular square or rectangle. We also need the overall height of the frame.
2. We will work you out a price for your cover and make necessary allowances for eyelets and cord.
3. Our costs are very competitive as we manufacture in house and hold stock on a wide range of mesh materials.

Side Lengths & Diagonals (if needed)	Square	Polygon	Hexagon	Diagonals (if irregular shape)
